

Data Scientist Job Description

We are looking for a Data Scientist to analyze large amounts of raw information to find patterns, develop predictive models, and provide actionable insights. You will work closely with cross-functional teams to drive data-driven decision making.

Responsibilities:

- Analyze large datasets to identify trends and patterns.
- Build and validate predictive models using machine learning algorithms.
- Communicate insights and recommendations to stakeholders.
- Collaborate with engineering and product teams to implement data-driven solutions.

Requirements:

- Bachelor's or Master's degree in Computer Science, Statistics, Mathematics, or related field.
- Strong knowledge of Python, SQL, and machine learning libraries (scikit-learn, pandas, numpy).
- Experience with data visualization tools (Matplotlib, Seaborn, or similar).
- Excellent problem-solving and communication skills.
